YOUR EXPERIENCE

Some knowledge

LEARNER PROFILE

Saarathi Gate Assessment

AI Engineering & Machine Learning Course in Nepal, LLMs, RAG, Agents, Fine-Tuning, Model Deployment & ML

Yash Deep Kunwar, your sharp logic and clear thinking are perfect for AI engineering.

FIVE DIMENSIONS

01 Attitude & Mindset

57%

You are kind but sometimes wait for others to speak first.

02 Learning Habits

100%

You correctly identified that explaining ideas proves you truly know them.

03 Thinking Ability

88%

You solved the logic puzzles about gardens and queues with ease.

04 Problem Solving

90%

You know how to break big problems into small, doable steps.

05 Course Curiosity

100%

You already understand how apps store data and use remote servers.

YOUR PROFILE

01

Your natural strengths

- You spot patterns in data very quickly.
- You understand how servers and apps talk.
- You explain complex ideas in simple words.

02

Areas to grow

- Try to share your ideas more often.
- Ask questions even if others are quiet.
- Plan your steps before telling the team.

03

Your first AI topics

- Python basics for data and math.
- How Large Language Models predict words.
- Using RAG to give AI new facts.

04

Actions for this week

- Spend 45 minutes on a logic puzzle.
- Write 3 questions about how LLMs work.
- Try one simple Python script today.

05

Staying on track

- Do not wait for others to ask.
- Avoid rushing through the easy math steps.
- Keep your 60 minute study blocks steady.

YOUR FIRST MONTH

1 WEEK 1

Setup Python and run your first AI prompt.

2 WEEK 2

Build a simple chatbot using basic RAG tools.

3 WEEK 3

Learn to clean data for machine learning models.

4 WEEK 4

Deploy one small model to a web server.
